Axis shade.

The versatile outdoor shelter

The perfect solution for enhancing public spaces with contemporary style and practical functionality. Designed with a robust steel framework and a sleek off-centered single pole, the Axis structure provides reliable shade while maintaining a minimalist aesthetic and maximizing usable space beneath.

Choose from a wide range of durable fabric colors and powdercoat finishes to create a custom solution that complements any urban or recreational setting. Ideal for parks, playgrounds, and community spaces, the Axis Shade Structure delivers long-lasting protection from the elements while elevating the usability and appeal of public areas.

"Shelter for Generations - Redefining outdoor spaces with solutions built to last."

Effortless Installation

Install quickly and easily making them ideal for fast, practical community solutions.

Offset Centre Pole

This unique design has a support pole slightly offset from the centre, this gives a lot of flexibility to position the structure to fit your space.

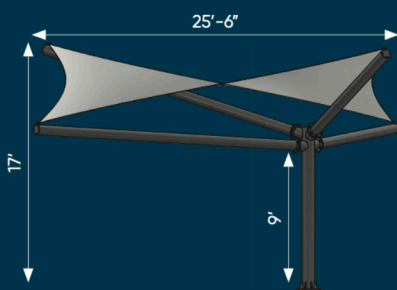

Built to Endure

Crafted with UV-stabilized fabric and a robust steel frame, the Axis Shade is engineered to withstand varying weather conditions and stand the test of time.

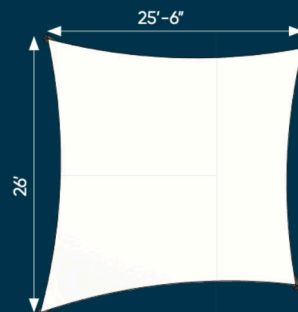

Customizable Colours

Wide range of colours, fabrics and finishes. A shade fully customized to your aesthetic for a consistent, professional look across public spaces.

Available Size

One Size - 26'x26'

Material

Premium UV-stabilized fabric. Steel frame for enhanced durability.

Wind Rating

Designed for high-wind performance. Engineered to meet site-specific wind loads as per local building codes.

Double axis.

The versatile outdoor shelter

A striking and versatile addition to any outdoor space, perfect for creating cool, shaded areas that enhance comfort and usability. Designed with two sturdy central poles and a sleek tensioned fabric canopy, this modern structure offers expansive coverage while maintaining an open, airy feel.

Ideal for poolsides, picnic areas, and community hubs, the Double Axis Shade combines durability with contemporary design. Its high-quality materials are built to withstand the elements, ensuring a long-lasting and stylish solution for your shade needs. Whether it's a spot for relaxation or gathering, the Double Axis Shade elevates outdoor experiences with ease.

"Shelter for Generations - Redefining outdoor spaces with solutions built to last."

Effortless Installation

Install quickly and easily making them ideal for fast, practical community solutions.

Double Centre Pole

This unique design has two support poles in the centre of the structure. Ideal when you need to cantilever your shade or when a single centre pole doesn't work.

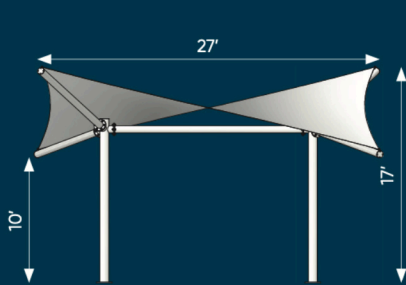

Built to Endure

Crafted with UV-stabilized fabric and a robust steel frame, the Double Axis structure is engineered to withstand varying weather conditions and stand the test of time.

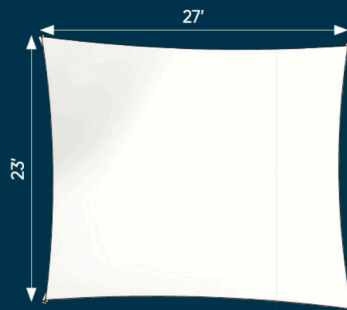

Customizable Colours

Wide range of colours, fabrics and finishes. A shade fully customized to your aesthetic for a consistent, professional look across public spaces.

Available Sizes

One Size - 27'x23'

Material

Premium UV-stabilized fabric. Steel frame for enhanced durability.

Wind Rating

Designed for high-wind performance. Engineered to meet site-specific wind loads as per local building codes.

Star shade.

The versatile outdoor shelter

A versatile and stylish solution for creating vibrant outdoor spaces. Featuring a sturdy steel framework and a single central pole, the Star Shade® provides reliable UV protection while maintaining clear, unobstructed views for maximum functionality.

Perfect for schools, parks, and community spaces, the Star Shade® combines innovative design with practicality, enhancing the usability of any outdoor area. With a wide selection of colors, fabrics, and finishes, our team can craft a custom shade solution tailored to the specific needs of your environment, ensuring both durability and visual appeal.

Tensara canopy.

All-weather protection

The Tensara™ Canopy is a high-performance tensile membrane structure engineered for large-span coverage without compromising on visual impact. Tensara™ delivers trusted performance and a future-forward design approach.

From full-size pickball & basketball courts to multipurpose zones and outdoor learning areas, Tensara™ delivers year-round protection from UV, rain, and heat - without closing in your space or limiting airflow.

"Shelter for Generations - Redefining outdoor spaces with solutions built to last."

Low Maintenance

New, improved fabric coatings with exceptional dirt resistance and superior smooth surfaces ensures your Tensara stays cleaner for longer.

Light Transmission

The Tensile Membrane allows plenty of natural light to illuminate the area below the canopy, eliminating the need for lighting during the day. Available in a range of fabrics that vary from medium to high light transmission.

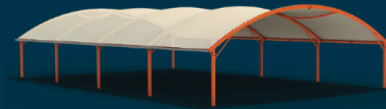

Weather Protection

The Tensile Membrane fabrics used have a UV blocker coating to prevent harmful UVA and UVB rays - this blocks more than 99% of the sun's damaging rays.

Large Clear-span

Tensara™ Canopies are tailored to span up to 150 feet, creating open, unobstructed coverage for large outdoor spaces. Each structure is custom designed to deliver long-lasting protection with a modern architectural finish.

Available Sizes

All structures are custom designed to the size needed.

Material

Premium weatherproof SKY® fabric. Steel frame for enhanced durability.

Wind Rating

Designed for high-wind performance. Engineered to meet site-specific wind loads as per local building codes.

Sky Fabric.

Engineered to last

SKY® fabric is the world's leading protector.

SKY® is an innovative fabric that stands for protection - taking good care of the people and assets under its cover. We called it SKY® because it guards our clients from the elements - sun, wind & rain. SKY® has been engineered to last. That's why we have given it an industry-leading 25 year warranty. Behind this technical, architectural product is a company with over 100 years' experience in manufacturing textiles.

No fabric is self-cleaning but this comes close. SKY® has a new and improved fabric coating to provide exceptional dirt resistance. Special colour pigments have been added, keeping it looking great for longer.

Tensara Canopy with SKY® fabric

Industry-leading 25 year warranty.

Easy to clean surface using standard cleaning methods.

Designed to be illuminated at night.

Shade torque.

Quick release tensioner

ShadeTorque™ is our proprietary quick release tensioning solution, designed to make shade installation faster, cleaner, and more reliable. Built from marine-grade 316 stainless steel, it delivers outstanding durability in even the harshest environments. The quick release design dramatically reduces installation and removal time, while the concealed mechanism creates a sleek, uncluttered finish.

Engineered for performance and security, ShadeTorque™ features a locking screw to prevent cable unhooking and a locking stud that holds tension firm—eliminating loosening over time.

**Fast to install. Secure in use.
Clean in appearance.**
